

The Regional Council of the South-East Cohesion Region

The Regional Council of the South-East Cohesion Region is the Managing Authority of the ROP SE. It was established by Act No 248/2000 Sb., on regional development support, in July 2006 as an implementation agency of the ROP SE.

The Regional Council's bodies:

- The Chair
- The Board (8 representatives of each region)
- The Office of the Regional Council

The process of project approval - the set-up of processes, project consultation and evaluation according to the evaluation criteria is performed by the Office of the Regional Council that submits a list of evaluated projects to the Regional Council Board for approval. The office of the Regional Council is also responsible for projects' implementation, accounts, payments, monitoring and evaluation.

A basic pre-requisite of the efficient use of financial resources (in addition to quality projects) is a functioning and transparent implementation structure. Territorial centres were founded in both the chartered towns of the Southeast Cohesion Region for this purpose.
